

2010-2011 Bobcat Recommendation Summary:

- The Division is recommending a 1 permit reduction from 4 to 3, a one week delay in the season from 11/24/2010 to 12/01/2010 and capping the number of permits at 4,600. This recommendation is in accordance with the Utah Bobcat Management Plan.
 - All 4 indicator variables in the Bobcat Management Plan indicate a decreasing population.
 - According to the management plan when 4 variables indicate a decreasing population the number of permits / individual is to be reduced by 1 or 2, the season length is to be shortened by 1 or 2 weeks and the number of permits are to be capped at 80% of the permits sold the previous year.

Bobcat Harvest

2010-2011 Furbearer Recommendation Summary:

1. Require a Furbearer License before temporary bobcat permits can be purchased (consistent with other species).
2. Require the name and address of the trapper who has another individual transport bobcat and marten in addition to current requirements in the Guidebook.
3. Remove seven and add three new sites to the beaver trapping closure list in the Guidebook.
 - a. Remove the following sites from the list:
 - i. Indian Peaks WMA (Beaver County)
 - ii. North fork Gordon Creek upstream of Coal Canyon Road (Carbon County)
 - iii. Beaver Creek drainage of the Price River (Carbon County)
 - iv. Land east of SR-150 and south of USFS roads 058, 072, 017 and 077, referred to as North Slope Road (Summit County)
 - v. Echo Creek upstream of the Weber River (Summit County)
 - vi. USFS Desert Exp. Station (Millard County)
 - vii. Green River from Flaming Gorge Dam and Taylor Flat Road (Daggett County)

- b. Add the following sites to the list:
 - i. Pine Creek (Beaver County)
 - ii. Willow Creek (Grand County)
 - iii. Willow Creek drainage (Uintah County)
 4. Applications for muskrat trapping on Waterfowl Management Areas will be on-line only beginning in 2010.
