Appendix: Historical cougar harvest by hunt unit .....	18

## INTRODUCTION

The cougar harvest report presents cougar harvest and hunter effort trends across the state of Utah, based on data collected from cougar hunters. This report represents the cougar portion of Federal Aid Project W-65-M, segments 71 and 72, grant agreement period July 1, 2022 through June 30, 2023 and July 1, 2023 through June 30, 2024, respectively. This Federal Aid project covers cougar hunting season 2022–2023, as outlined in the Utah Cougar Guidebook 2022–2023.

This annual report presents the most complete and accurate summary of cougar harvest data available at the time of publication. Occasionally, we will adjust a previous years' harvest numbers in a subsequent report as more data are made available after publication. This is typically the case with counts of depredation (Wildlife Services/UDAF removal) mortality, and only rarely will counts of hunter-harvest need adjustment. In addition, age data from cougars harvested during the most recent summer or fall seasons are often not available at the time this report is published each year. Therefore, age data and survival data are tentative for the current year, and will be finalized in the following year's report. Where data differ between reports, the most recent annual report should always be the most accurate and up-to-date.

## METHODS

### Season Dates

The limited-entry cougar hunting season opened November 2, 2022 and closed February 19, 2023, at which time limited-entry units became harvest-objective units from February 25, 2022 to June 30, 2023, except for the Oquirrh-Stansbury, East and Wasatch Mtns, West-Strawberry units that transitioned to harvest objective a month later. The harvest-objective season for harvest-objective-only units opened July 1, 2022 and closed June 30, 2023. Spot & stalk season was July 1, 2022 through June 30, 2023. Cougar pursuit season was from November 2, 2022 through May 31, 2023, except for the Book Cliffs, East; La Sal; and San Juan, Mountains units, which closed to pursuit on March 31, 2023.

2022–23 was the first cougar season with revised harvest-objective season dates of July 1 through June 30 of the following year (previously the harvest-objective season was November to November). However, for consistency and to reliably track harvest trends, this annual report still calculates the cougar “year” or “season” as **November to November** of the following year.

### Limited-Entry and Harvest-Objective Hunts

There were a total of 53 limited-entry split and harvest-objective cougar hunting units during the 2022–23 season. Nine units were managed through a limited-entry permit system, where a hunter had to apply for and draw from a pool of limited permits. Hunters were allowed to hunt cougars in their drawn unit during the limited-entry season. Forty-four units were managed through a harvest-objective system, where an unlimited number of hunters could hunt and each unit remained open until its quota (harvest objective) was filled, or the season ended. In 2022–23, 36 of these harvest-objective units were under active predator management, which meant these units had no quota and an unlimited number of cougars could be taken until the season closed.

All limited-entry cougar units opened again as harvest-objective units after the close of the limited-entry season. Quotas on these units equaled the total number of limited-entry permits issued on each unit minus the cougar harvest during the limited-entry season. Limited-entry permits became valid statewide harvest-objective permits if hunters did not harvest a cougar during the limited-entry season, and all harvest-objective permits were valid on limited-entry units that had transitioned into harvest-objective units.

Applicants who drew a limited-entry permit for the 2022–23 cougar seasons were required to wait 3 years before applying for another permit. The waiting period did not apply to harvest-objective permit holders.

### **Spot & Stalk Hunt**

An unlimited number of spot & stalk permits were valid for the 2022–23 cougar season. Hunters could purchase these permits over-the-counter, year-round. Permit holders could hunt in any unit type, open or closed, but were not allowed to use dogs to pursue or hunt cougars. Harvested cougars taken with spot & stalk permits did not count towards harvest-objective unit quotas.

### **Pursuit**

Cougar pursuit was authorized in 52 cougar units (all except Wasatch Mtns, Salt Lake) during the 2022–23 season provided pursuers obtained a valid cougar pursuit permit. An unlimited number of pursuit-only permits, valid on any open unit statewide, were available. Hunters who obtained a limited-entry or harvest-objective permit could pursue cougar on the unit for which the permit was valid.

### **Harvest Data Collection**

All successful hunters were required to have their cougar checked at a Division office or by an officer within 48 hours of harvest. At that time tooth samples were collected and a permanent tag affixed. Cougar harvest and hunter effort information was also collected. Teeth were sectioned and cementum annuli counted by an independent lab to estimate age of harvested cougar. Cougars aged to be 3-yrs or older were considered adults for the purposes of calculating percent adult females in the harvest. Cougar pursuit information was obtained using a telephone survey of a statistically-valid random sample of cougar pursuit permit holders.

New in 2022–23, hunters could harvest a maximum of two cougars. However, hunters were restricted to a maximum of one limited-entry permit and a maximum of one spot-&-stalk permit. Female cougars with kittens, or kittens with spots, were not legal to harvest.

### **Livestock Depredation**

Harvest data from depredating cougar were taken from damage reports received from the Utah Department of Agriculture (UDAF). Prior to 2023, USDA-APHIS Wildlife Services provided all depredation services and reports. Livestock operators could kill damaging cougar and were required to have the carcass checked by a Division officer within 48 hours. Harvest information

was collected at that time. Other mortality includes DWR control, roadkill, poaching, found dead, etc.

**Important:** In 2023, the Utah Legislature passed H.B. 469, a code change that removed the requirement for a permit to hunt or pursue cougars in Utah. The bag limit was removed as well, and hunters could now trap cougars, following current trapping rules and guidelines. Cougar hunting seasons were eliminated and anyone with a Utah hunting or combination license could hunt cougars year-round. Hunters were still required to follow all check-in, tagging, and tooth removal regulations, and it was still not legal to pursue and/or harvest kittens with spots or females with kittens. This new law started May 3, 2023, with minimal effect on the 2 months remaining in the 2022–23 cougar season.

While the new law effectively eliminated cougar hunting seasons, this annual report will continue to define “year” or “season” as November to November of the following year, in order to consistently track harvest and hunting trends.

## RESULTS

For the 2022–23 cougar season, 108 limited-entry permits and 2,689 harvest-objective permits were sold. Limited-entry permits included 106 unit-specific limited-entry permits, one statewide conservation permit, and one statewide sportsman’s permit. Limited-entry and harvest-objective hunters harvested 476 cougars. 1,322 spot-and-stalk permits were sold and 25 cougars were harvested during the 2022–23 hunting seasons with this permit.

Thirteen cougars were taken by Wildlife Services and UDAF during the 2022–23 season, and 18 cougars were killed by DWR personnel and landowners (with or without depredation tags). There were an additional 16 other mortalities (roadkill, other, DWR control). 836 cougar pursuit permits were sold and 565 pursuers went afield during the 2022–23 cougar pursuit season. Cougars treed per pursuer was 5.6 with 0.15 cougars treed per day-afield.

Cougar permits sold since the implementation of limited-entry hunts, Utah 1990–2023.
