| 9. Adjourn                                                                                                                              |                      |

Due to the COVID-19 pandemic and the ability of the virus to spread from person to person public gatherings are strongly discouraged by the CDC, State of Utah, and local health departments since they facilitate face-to-face contact and pose an elevated risk for virus transmission. The Division of Wildlife Resources and the chair of this public body have determined that public gathering at Cooperative Wildlife Management Unit advisory meetings presents a substantial risk to the health and safety of those who attend—and will conduct this meeting using a fully electronic format. Anyone wishing to comment on agenda topics in future meetings or to observe this meeting may do so by logging on to the Division’s webpage at <https://wildlife.utah.gov/feedback.html> where instructions and links are provided.
