

Appendix 1B: Species List

The following is a summary of species included in the Great Salt Lake Waterbird Survey between 1997 and 2017. Common names are listed along with the associated Latin name and four letter codes used by the American Ornithologists Society and this report. As indicated in the following table, the six letter codes are unique to this report and represent a particular suite of species. Species with counts of fewer than 10 individuals are not listed below.
